The agentic business kit.

Sell. Get paid. Close the books. Get funded.

Commerce and finance for stablecoin businesses, installed and run by your own agent. Testnet.

One prompt.
Not a project.

Long checklists and a docs maze make setup feel like work.

Leave **space** between the steps, and show when you are **done**.

Docs | API reference | SDK | Webhooks

Integration checklist

- [ ] 1. Read the overview (section 1.2) →
- [ ] 2. Create an account and an API key
- [ ] 3. Install the SDK, see Node and edge notes
- [ ] 4. Configure environment variables (7)
- [ ] 5. Add the checkout route
- [ ] 6. Verify domain ownership (DNS TXT)
- [ ] 7. Add the webhook handler and raw body parser
- [ ] 8. Verify signatures, check the timestamp
- [ ] 9. Map order ids to invoice ids
- [ ] 10. Handle refunds, retries, idempotency
- [ ] 11. Run the test payment
- [ ] 12. See also: troubleshooting, limits, FAQ

Before — Twelve steps, and nothing says you are done.

Prompt for your AI agent

Install Stenmont on my site: catalogue, checkout and webhooks. Keep the API key on the server. Tell me when it works.

Copy prompt

Your site, connected. 4 / 4

Installed by your own agent

- Site reachable
- Domain ownership
- Signed webhook
- Test payment

Sample data

After — One prompt to start, four checks to finish.

Sell from one place, not five tabs.

Products, variants and a public store page belong together.

Keep related things in **one view** and let the storefront follow.

products_v7.xlsx

SKU	Price	Stock
TOTE-M	24	?
MUG-01	18.0	12

Payment links tool

Link 1: tote · $24
Link 2: mug · $18
Link 3: tote (blue)?

Site editor

Paste product text here...
Update prices by hand

Before Products live in a sheet, links in a tool.

Catalogue Imported · 42 products

Canvas tote — 3 variants — **from $24.00**

Ceramic mug — 2 variants — **$18.00**

Linen shirt — 6 variants — **from $56.00**

Public store page — Sample data

Acme Studio

Canvas tote from $24.00

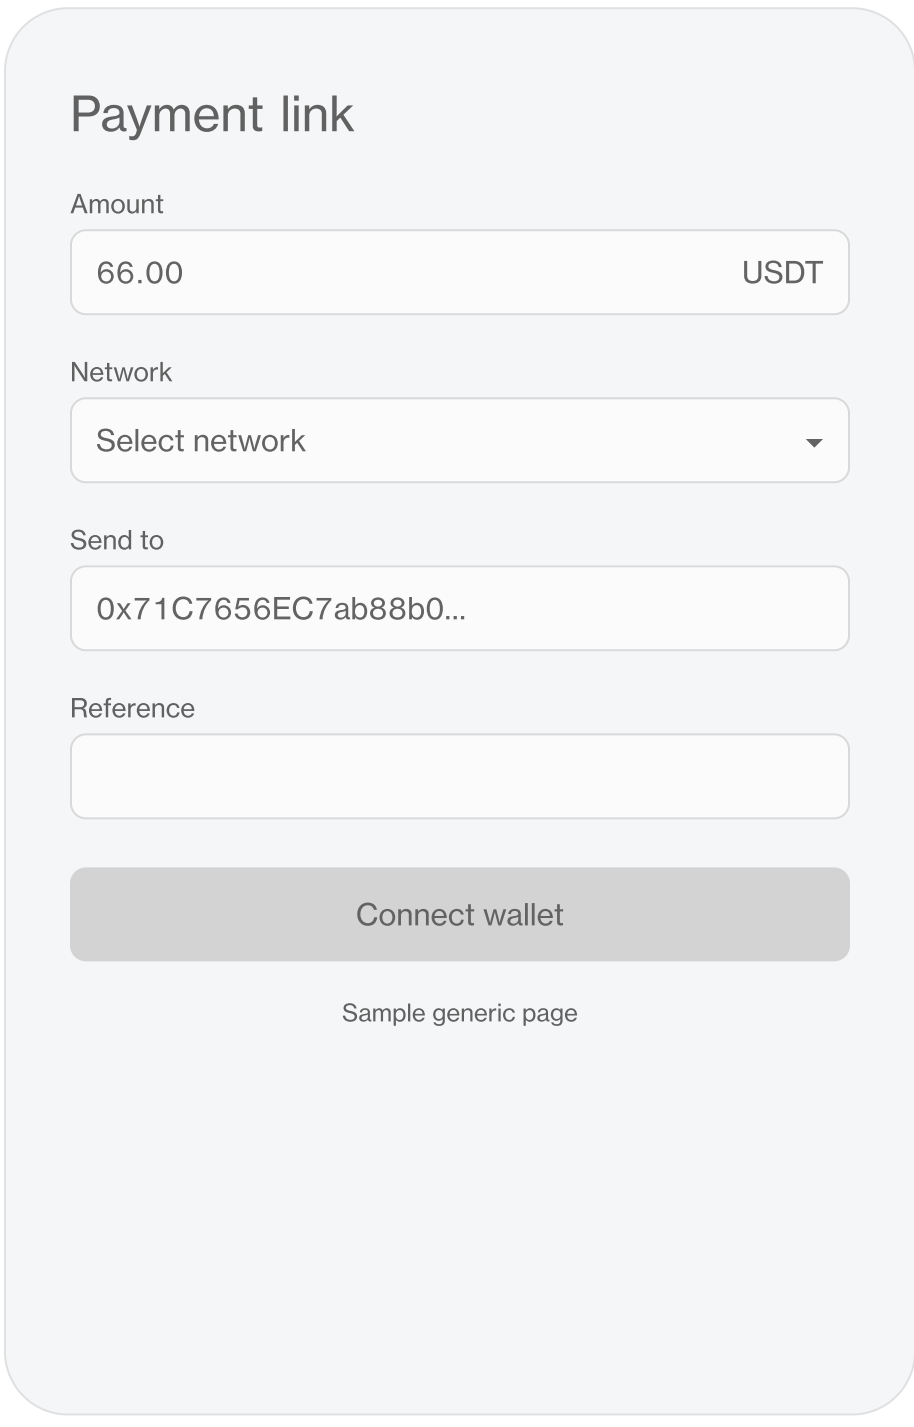

Ceramic mug $18.00

After One catalogue, one public store page.

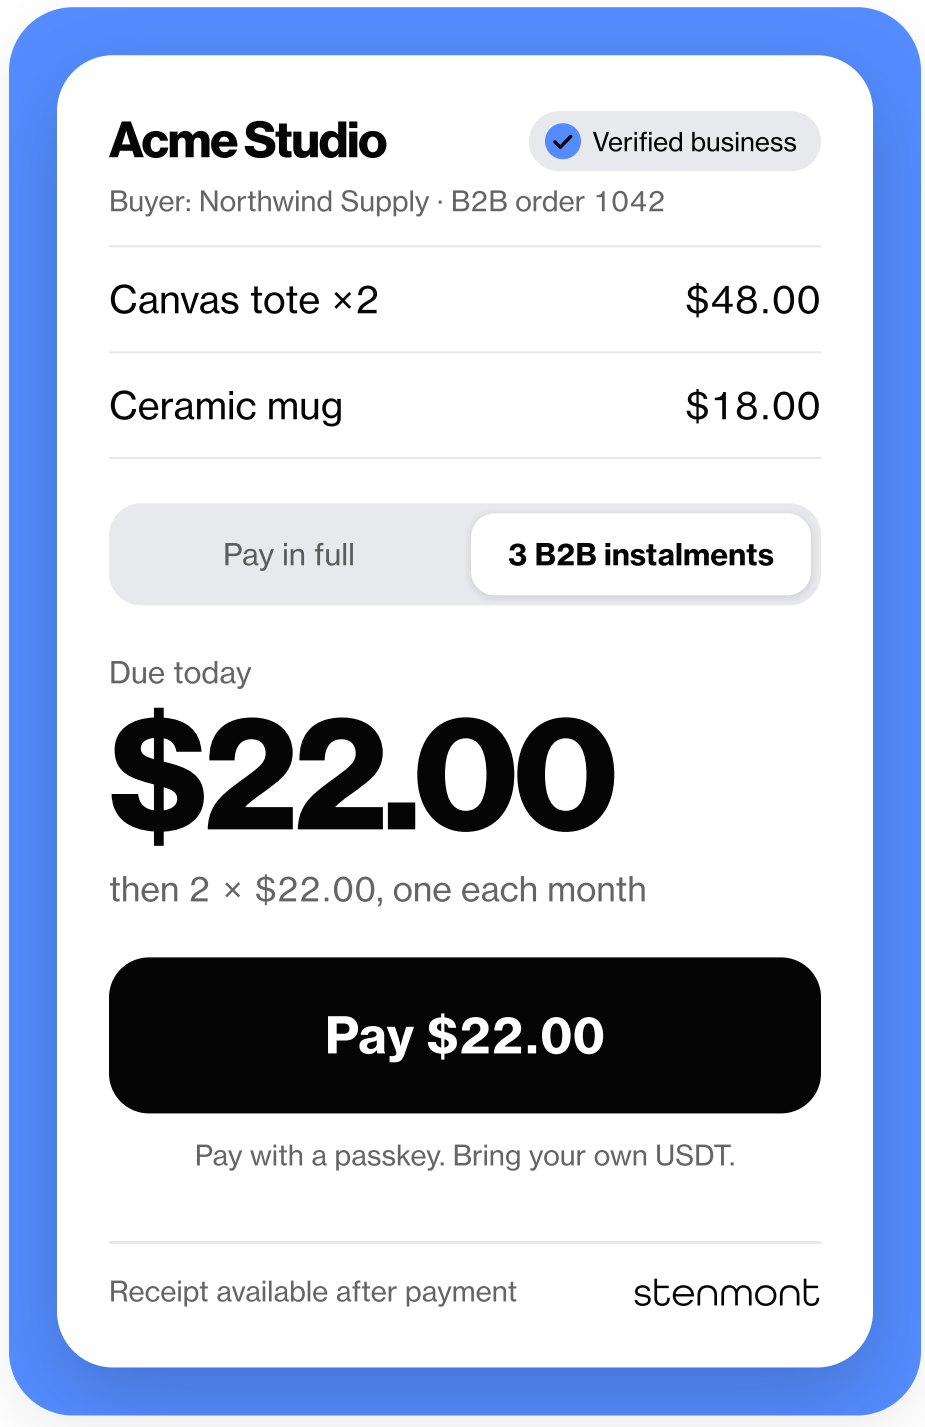

Make one button impossible to miss.

A pay page like every other page makes people hesitate.

Show **who** and **what for**, offer B2B terms, leave one black button.

Before — Many fields, no clear next step.

After — Verified, itemised, one button. Sample data.

Close the month without a spreadsheet.

Raw payments are not books. People read the total first.

Lead with the **answer**: big type for the result, small for the proof.

date	what	in	out
10/2	pmt order 1031	66.00	
10/3	refund?? mug		18.00
10/3	pmt (dup?)	66.00	
10/5	tote x2	48	
10/6	TBD		?
10/10	pmt order 1036	130.00	
10/10	fee? check bank		2.4
10/12	refund order 1033		56.00
10/14	pmt order 1040	24	
10/15	no match	900	
10/17	pmt order 1041	66.00	66.00
10/20	??		31.5
10/21	pmt order 1044	112	
10/23	copy from export	18.00	
10/24	refund order 1038		24.00
10/28	pmt order 1047	56	
10/30	totals wrong	=SUM(?)	

Before — Guesses, duplicates and no total you trust.

October books — Sample data

Month closed

Received **$12,480.00**

Refunded **$180.00**

Signed root `0x9c1e…a7f2`

Export for your accountant

CSV | **QuickBooks** | **Xero**

After — Service-signed proof, not an onchain anchor.

Let the agent draft. You decide.

Overdue emails written by hand take time and set the wrong tone.

Show the draft, the **limits** it follows, and a clear **Approve** or **Deny**.

To accounts@northwind.example

Subject Re: Re: Re: Overdue??

Hi, just following up again on the October order, still showing unpaid on our side. Not sure if you saw my last two emails. Could you let me know when this will be sorted?

Thanks, and sorry to chase

Send Attach

Written by hand · third reminder · tone checked by nobody

Sent Oct 21 Re: Overdue order 1038

Hi, a quick reminder about the order. Let me know if there is an issue.

Notes Chase list

- ☐ Northwind: call on Monday
- ☐ Harbor & Pine: email again
- ☐ Orchard Labs: ask their accounts team

Before Chased by hand, again and again.

Collections agent Draft only

Order 1038 · Northwind Supply

$1,250.00 · 12 days overdue

Drafted reminder

Hi Northwind team, a friendly reminder that order 1038 ($1,250.00) was due on Oct 28. Here is the pay link. Thank you!

Policy limits

- ✓ Discounts up to 2%
- ✓ Up to 3 B2B instalments
- ✓ Extensions up to 7 days

Approve **Deny**

After Drafts for your review. No messages sent.

Let agents do the back-and-forth.

Copying between systems is where mistakes and delays creep in.

Show each **step** the agent took, so you can follow it and check it.

By hand

Email: “Can you quote 40 units? – Sam”

copy ↓ paste

Sheet: supplier / qty / price ?

retype ↓ paste

Chat: “quote is 1200, I think”

copy ↓ paste

Pay link pasted into the supplier’s portal

retype ↓ paste

Books: amount typed in again by hand

Before Copying and pasting between systems.

1 Your agent resolves the name
`supplier.stenmont.eth`

2 Reads its agent card
Read quotes · prepare drafts · retrieve existing pay links

3 Requests a quote · 40 units
$1,200.00
valid 24 hours

4 Prepares an invoice draft
Human review required

5 After the business approves
Retrieve the existing pay link. Nothing paid.

Sample data

After Read, draft, review. People approve.

Stop pasting keys.
Grant scoped access.

Revoke copied keys. The chat keeps its history.

Ask for **exactly** the access needed, and make it easy to **revoke**.

Chat

Can you connect to my Stenmont account?

Sure. Paste your API key here.

[API key redacted]

Unsafe example · no key shown

This key lets me read the account data it allows.

Thanks. Keep it in this chat in case you need it again.

Before A copied secret, exposed in chat.

Connect Claude?

Claude wants to act for **Acme Studio**. It can:

read — See your invoices, payments and exports

draft — Prepare refunds for you to review. Nothing is sent until you confirm

Large action · sample data

This refund exceeds the configured approval limit. A person must approve it with World.

Approve with World

Connected apps
